Dear Directors:

We are pleased to support the Alameda County Community Wildfire Protection Plan to fulfill the standards established by the Federal Healthy Forest Restoration Act (HFRA). The plan will act as a multi-year guiding document that will facilitate implementation of present and future fire hazard mitigation measures.

The Community Wildfire Protection Plan developed for Alameda County:

- Was collaboratively developed. Interested parties and agencies managing land in Alameda County have been consulted.
- This plan identifies and prioritizes areas for hazardous fuels reduction treatments and recommends types and methods of treatments that will protect community members and values at risk.
- This plan recommends measures to reduce ignitability of structures throughout the area addressed by the plan.

We mutually agree with the contents of this Community Wildfire Protection Plan.

Yours truly,
